

TUTORIAL: Primitive Skills in the Modern World
 Prof. John Whittaker

Fall 2003

Class: T Th 8:00-10:00 Goodnow 206
 Office: Goodnow 207 Extension 3447
 Office Hours: MWF 8:30-10:00.

Modern popular culture is seeing a revival of interest in primitive skills: traditional technologies such as flintknapping, archery, weaving and basketry, fire-making, and tracking. We will combine practical experience to learn a couple of simple pre-industrial technologies with reading and writing to explore questions raised by the term “primitive skills.” What is our notion of primitive, and why does “the primitive” appeal to people today? What is skill? How are skills learned and differently valued in the context of our culture?

One purpose of the tutorial is of course to help you learn skills: the scholarly skills of finding information, reading critically, writing clearly, and discussing logically. As much as possible, class sessions will focus on discussion of readings, activities, and the written assignments rather than lecture. Accordingly, it is your responsibility to come to class, and to come prepared: do assigned reading and writing before the class for which it is listed, think about it, and arrive with ideas to talk about.

Grading will be based on six short written assignments, an oral presentation, and class participation.
