Course Overview

This course will introduce students to some of the central issues and debates in American Environmental History, ranging from the period of early colonial settlement to the present day. By focusing on the complex relationship between human communities and their surrounding environments, we will explore how the natural world has shaped the changing social, economic and political landscape of America, and conversely, how people have labored to transform, conserve, and appropriate nature to suit their own designs. Key topics will include: the shifting patterns of land use and resource management among Native American and settler communities; the ecological transformations wrought by commercial agriculture and industrial capitalism; the evolving role of the state in environmental policy; the growth of conservation and public health movements; and the changing ways in which people have conceptualized, portrayed, and interacted with the material world around them.

Required Texts

All required books are available for purchase at the Campus Bookstore. A copy of each text is also available on Reserve at Burling Library.

Course Requirements

Class Participation
Class discussion provides our main opportunity to examine and debate the complexities of environmental history. It is crucial, therefore, that students come to each class fully prepared to participate and discuss the topics at hand. This involves not only completing the assigned readings prior to class, but also taking some time to think through the particular issues and questions that emerge from each text. Since class participation will count for 20% of your grade,
please make a serious effort to engage the readings and contribute your ideas, perspectives, and questions during each class.

Class Attendance
Please contact me if a medical or personal issue is preventing your class attendance, and have the relevant office (Health Services or Student Affairs) do the same.

Three short papers (5 pages in length), due Feb. 18th, Mar. 13th, and Apr. 16th
These papers will require you to engage critically with a specific historical issue or primary source, drawing upon the course material to create your own analytical argument. I will post the topics on Pioneer Web about two weeks before each deadline. Students who wish to explore a topic of particular interest for their third paper may talk to me ahead of time about the possibility of doing so. All papers must be typed, double-spaced, and in a 12-point font with consistent footnotes or endnotes. Additional guidelines for the papers will be discussed in class.

Final exam (take-home), due May 15th
The final exam will be in essay format and will be cumulative. Students will be expected to draw extensively upon the ideas and readings discussed throughout the semester. I will email the essay questions one week before the deadline.

Late assignments: Late papers will receive a deduction of 1/3 of a letter grade per day. Exceptions may be made for legitimate medical or personal issues. However, absolutely NO final exams will be accepted after May 16th. The college requires that ALL coursework be submitted by the end of exam week unless you are taking an incomplete in the class.

Disabilities: If you have specific physical, psychiatric or learning disabilities and require accommodations, please let me know early in the semester so that your learning needs may be appropriately met. You will need to provide documentation of your disability to the Associate Dean and Director of Academic Advising, Joyce Stern, whose office is located in Rosenfield Center (x3702).
